

Ashok presents the following ((keynote)) to EUROTAS in Crete. This is his third keynote presented to this Community. Here is an abstract of his presentation:

Quest for the Missing ((Logos Code)) for TransPersonal Life and Culture

In my two previous presentations to EUROTAS I sought to situate the enterprise of EUROTAS in the context of Global Wisdom and Enlightenment. In my first appearance in Germany I opened the theme of the urgency of dilating the discourse of transpersonal culture in terms of the quest for the missing Grammar of Logos. More recently (in Latvia) I developed this theme further with the focal topic: *The Importance of Transpersonal Literacy in the Emergence of Awakened Global Consciousness: Our Maturation as a Species*. Immediately following this presentation an intense spontaneous dialogue ignited and I felt encouraged to return to further develop this vital topic. My current work: *Awakening Global Enlightenment: Our Maturation as a Species* is unfolding well, and this emerging new book focuses on bringing out the ultimate mystery quest for the missing Code of LogoSophia. This exploration demonstrates that our diverse scriptures and enlightenment teachings are all rooted in a primal Global Logos- whatever name we use for What is First: Yahweh, AUM, Tao, Allah, Christ, Brahman, Sunyata, Logos, Sophia....How appropriate that the birthing of European Wisdom in Athens traces to the dialogues of Socrates as rendered by Plato. This is a perfect and timely occasion to convene an open deep dialogue on the foundational Grammar of Transpersonal Life and Culture. This goes to the heart of the central topic of *Metamorphosis- Disintegration, Integration, Conscious Living*.

Ashok Gangadean, Ph.D.

Margaret Gest Professor of Global Philosophy (Haverford College, USA)

Founder-Director of the ((Global Dialogue Institute))
